AVX GiGUARD ESD PROTECTION DIODES

CUTTING EDGE MINIATURE LEADLESS TVS DIODES FOR ESD PROTECTION OF HIGH SPEED SIGNAL LINES

Version 18.4
GiGuard - ESD Protection for High Speed Circuits

AVX Bi-directional Leadless Transient Voltage Suppressor Diodes
Provide ESD Protection for High Speed Communication and Data Lines

GENERAL DESCRIPTION
Utilizing the latest in TVS Technology combined with a unique leadless package, the new GiGuard series of ESD Suppression Diodes offers Clamping Voltages below 12v and cap values as low as 0.3pf. This combination of excellence both protects sensitive ICs during ESD events and preserves the integrity of the protected high speed signals. The AVX GG series fits perfectly onto the same PCB solder pads as standard EIA 0201/0402 components. The GG series complies with IEC 61000-4-2(ESD), Level 4+ (±20kV air, ±20kV contact discharge), IEC 61000-4-4 (electrical fast transient -EFT) (20A, 5/50 ns), very fast charged device model (CDM) ESD and cable discharge event (CDE).

APPLICATIONS
• USB 2.0/3.0
• Tablets/Cell Phones Touch Screens
• Network Communications
• Gigabyte Ethernet
• High Def Multimedia Interface (HDMI)
• Mobile Phone Touchscreen

FEATURES
• Low Capacitance (.3pf to 17pf typ)
• Low Vc (<12v @ 1a)
• Bi-Directional protection
• Leadless 0201/0402 case size
• -55ºC 125ºC  ~ Operating Range

HOW TO ORDER

TEMPERATURE DERATING

TEMPERATURE DERATING CURVE

GG Series Temperature Derating Curve

DIMENSIONS

RECOMMENDED REFLOW SOLDER PAD

RECOMMENDED SOLDER REFLOW PROFILES

RECOMMENDED SOLDERING CONDITION 1

(1) Solder: 0.12~0.18mm Thread solder (Sn96.5:Ag3.5) with soldering flux in the core Rosin-based and non-activated flux is recommended.

(2) Preheating: The Devices shall be preheated so that Temperature Gradient between the devices and the tip of soldering iron is 150°C or below.

(3) Soldering Iron: Rated Power of 20w max with 3mm soldering tip in diameter. Temperature of soldering iron tip 300°Cmax, 3-5sec (The required amount of solder shall be melted in advance on the soldering tip.)

(4) Cooling: After soldering. The Devices shall be cooled gradually at room ambient temperature.

RECOMMENDED SOLDERING CONDITION 2 – WITHOUT PREHEATING

(1) Temperature of soldering iron tip 300°Cmax, 3-5sec.

(2) Solder iron tip shall not directly touch to Devices.

(3) Solder iron tip shall be fully preheated before soldering while soldering iron tip to the external electrode of Devices.

Hand Soldering Cautions

In hand soldering of the Devices. Large temperature gradient between preheated the Devices and the tip of soldering iron may cause electrical failures and mechanical damages such as cracking or breaking of the devices. The soldering shall be carefully controlled and carried out so that the temperature gradient is kept minimum with following recommended conditions for hand soldering.

PACKAGING SPECIFICATION

- Carrier tape and transparent cover tape should be heat-sealed to carry the products, and the reel should be used to reel the carrier tape.
- The adhesion of the heat-sealed cover tape shall be 25~60 grams with nominal of 40 grams.
- Both the head and the end portion of the taping shall be empty for reel package and SMT auto-pickup machine. And a normal paper tape shall be connected in the head of taping for the operator to handle.
