AVX developed the 9159 Series of SMT connectors for co-planar PCB mating for the challenging Solid State Lighting (SSL) market. These connectors needed to be small, low in height, carry up to 5 Amps/contact and then function up to 125°C for extended periods. This application has been very unique to the SSL market where PCB's are stacked end-to-end to create linear strip lighting in everything from office to transportation applications where products are exposed to harsh mechanical and environmental environments.

This vertical plug connector opens up the spectrum to include all commercial, industrial and transportation applications requiring perpendicular PCB mating and latching Wire-to-Board cabled sockets with an already proven connector system. With sizes from 2p-6p, these gold plated contacts mate with high spring force beryllium copper receptacle connectors.

| • Allows assembly of PCB's at right angles  
• Accepts 24-9159 IDC wired/cabled socket  
• Reference application notes 201-01-123  
• Reference Product Specification 201-01-119 | • Single sided SMT RoHS solder attachment  
• Centrally located pick & place cap for easy placement  
• Gold plated BeCu contact system for high reliability in harsh environments  
• Available in white: supports SSL market preferences |
